Teaching Interests

Property insurance; risk management

Statement of Goals for Office

ARIA should continue to be the premier organization for risk and insurance academics. Promotion of risk and insurance research is essential in growing the ARIA brand among the academy. It is also important that ARIA continue to encourage the growth of risk and insurance educators and programs.

I would hope to represent ARIA membership in these goals. In particular, I would advocate for ARIA activities and deployment of resources that support both research and teaching development in the field of risk and insurance.
